1- Introduction to Mabaret Al-Asafra labs:

Mabaret Al-Asafra Laboratories was established in 1982 as a single laboratory in Mabaret Al Asafra Hospital in Alexandria by a group of the most efficient workers, which helped in the massive rapid expansion over the course of nearly 40 years. They offer around 1200 test which are done by our distinguished team. Mabaret Al-Asafra laboratories serve millions of customers and perform millions of tests every year through ١٠ branches in Alexandria for our customers, also through home visits, and through deals with companies and various unions, and lab-to-lab service, which covers most of the governorates of the Arab Republic of Egypt. Mabaret Al Asafra laboratories offer high quality services at competitive prices. Therefore, a chain of laboratories is considered a pioneer in providing an effective and low-cost service. Mabaret Al Asafra branches in Alexandria: Asafra Branch, Abu Qir Branch, Azarita branch, Bolkely Branch, Gleem Branch, Muharram Bek Branch, Raml Station Branch, Roshdy Branch, Smouha Branch, Agamy and Sidi gaber Branch.

Some branches need support, they need marketing plans to increase the rate of profit growth and patients' entry to them. They also need a marketing plan for some types of existing tests that are not in great demand or people are not aware of their existence in the laboratories, they also need to tell people about the services provided by the laboratories

- What are supposed to be done in the lab such as to **measure, analyze, and test**.
- The aim of this laboratory is to improve health by providing all tests, and many other services.
- The lab uses high techniques managed by well-trained doctors & staff and distinguished with their performance of work.
- All services are developed each period to meet the patient's needs & satisfaction.

Mabaret El-Asafra is considered as a mega lab, it provides many services, divided into 2 types of services: A. Services provided to patient:

- Almost all types of testing. (More than 1000 tests)
- Main branch works 24/7.
- Home visit testing.
- Delivery of results & reports (Delivery or Online).
- Customer Service (WhatsApp numbers, Facebook page, Hotline = 19605).

B. Services provided to business:

- Periodic checkups to some organizations such as Companies, Banks, Schools and many of Petroleum Companies. (Ex: Petro jet, Abo-Quer and Al-Mokawloon Al- Arab, etc.)
- Discounts for employees for many organizations.

Note:

All branches provide same services with the same high quality to maintain the patients' care.

2- Microenvironment:

Management:

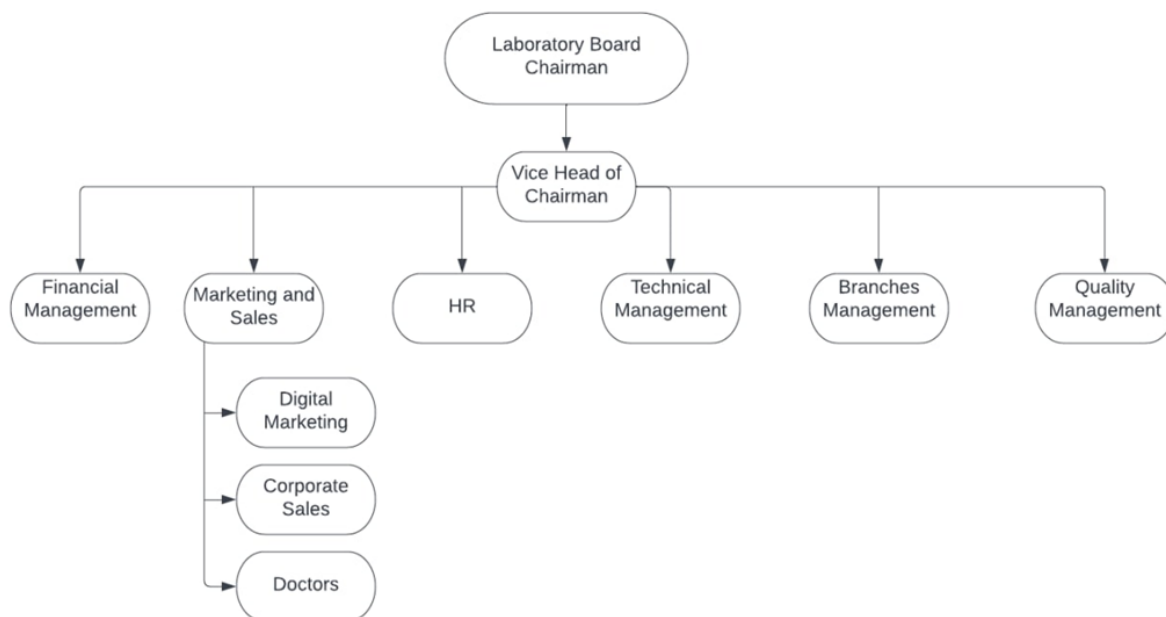

Figure 1

Decentralized organizational structure all senior positions are present in the main branch while in other branches one representative of each sub management is found there.

Suppliers:

The suppliers are divided into 2 groups,

Local suppliers: They are responsible for the consumables like stationary such as papers, pens and ink and Medical supplies such as Syringes, gloves, tubes, etc.

External suppliers: They are responsible about the huge machines and devices and the chemicals that the lab need: Cobas 8000 (Roche), Cobas C513 (Roche), Atellica (Siemens), Sysmex 9000, BD FACS lyric flow cytometry, BD FACS Canto II flow cytometry, Luminex (LABScan 30)

Marketing intermediaries:

Medical insurance, Syndicates, Law office, Banks that can facilitate communication with lab and make offers for those with a specific bank or medical insurance.

Competitors: Any mega lab is considered as a competitor as: Hassab, Cataract, El mokhtbar, El borj, Alpha.

3- Macroenvironment:

Political:

Politics control all sides of the country, most importantly economy. In turn affecting on one hand the price scale of all needed tests , used equipment to run those tests whether to buy or for maintenance , it may be also an obstacle for Importing those materials from abroad , additional to policies & regulations the government impose which organization must follow in case of any

violation the organization make to them e.g. : taxes contravention ..etc. it may cause the corruption of organization reputation or the closure of it all

Economic:

Disturbance in exchange rate (ex. increase in dollar price "inflation rate" as it affects the organization therefore the cost of the equipment and testers will increase).

Workforce rate: covid 19 had a negative impact on the lab in the first wave as the workforce decreased into half.

Unemployment rate: due to the expansion of new branches to come, deficiency in workforce, as they look for skilled, technical, professional and well-educated employees.

Worldwide Epidemics: resulted in closing of branches as it affects the economical state of the lab according to WHO policies.

Social:

Population growth rate: according to the increase in population, we tried to cover their demand with different branches in many regions

Age: all needed tests are available for different patients from infants to elders.

Lifestyle: Most of males are smokers which make them exposed to lung Cancer.

Huge number of people doesn't have awareness about health and hygiene which leads to diseases such as food poisoning.

Career attitude: some natures of jobs expose their workers to a lot of radiation and smoke which makes them in need of frequent checkups.

Health consciousness: society suffer from lack of awareness, which appears during covid epidemic as people didn't commit to the mask or precautions.

Technological:

Technology Incentives: provide equipment up to date suits Laboratory level of quality and professional to ensure the accuracy of results and patient care consequently, gain the patient's satisfaction and trust.

Level of innovation: Search for new service to provide in addition to unique ways to reach the patient.

Automation: lab afford all machines to analyze, run the tests and send results automatically to the system on time.

Technological Awareness: recruit staff well educated, specialist at medical equipment - system - databases, advanced computer skills, able to keep up with new era of technology.

Environment:

Weather Changes in case of emergencies and weather fluctuations:

- 1- Offers home service to take sample from patient at home.
- 2- Deliver results online or through trusted delivery service to conserve patients' confidentiality.

Legal:

Employment law: contract between employees and organization which includes annual disputes, wrongful termination, salary, pensions, insurance, employment relation proof.

Consumer protection:

- 1- saves the confidentiality between patient and lab, as it prevents leaking of information to keep the trust with patients.
- 2- no insurance plan can reject you, charge you more, or refuse to pay for essential health benefits for any condition you had before your coverage started, the plan can't deny.
your coverage or raise your rates based only on your health.
- 3- To have the freedom to choose which doctor he wants and type of test he wants.
- 4- To have the right to complain in case of the presence of any defect in the results.
- 5- The commodity should fulfill consumer's basic needs

Copyrights: To protect trademark and copyright holders against unauthorized use of their work and brands, the Egyptian Legislature has enacted Law no. 57 of 1939 for the Protection of Trademarks and Trade Information, and the Law no. 354 of 1954 for the Protection of Copyrights. Following which, the Law no. 82 of 2002 for the Protection of the Intellectual Property Rights replaced the former laws, which governs the protection of Trademarks, Trade Secrets, Patents, Industrial Designs, and Copyrights

Health and Safety laws:

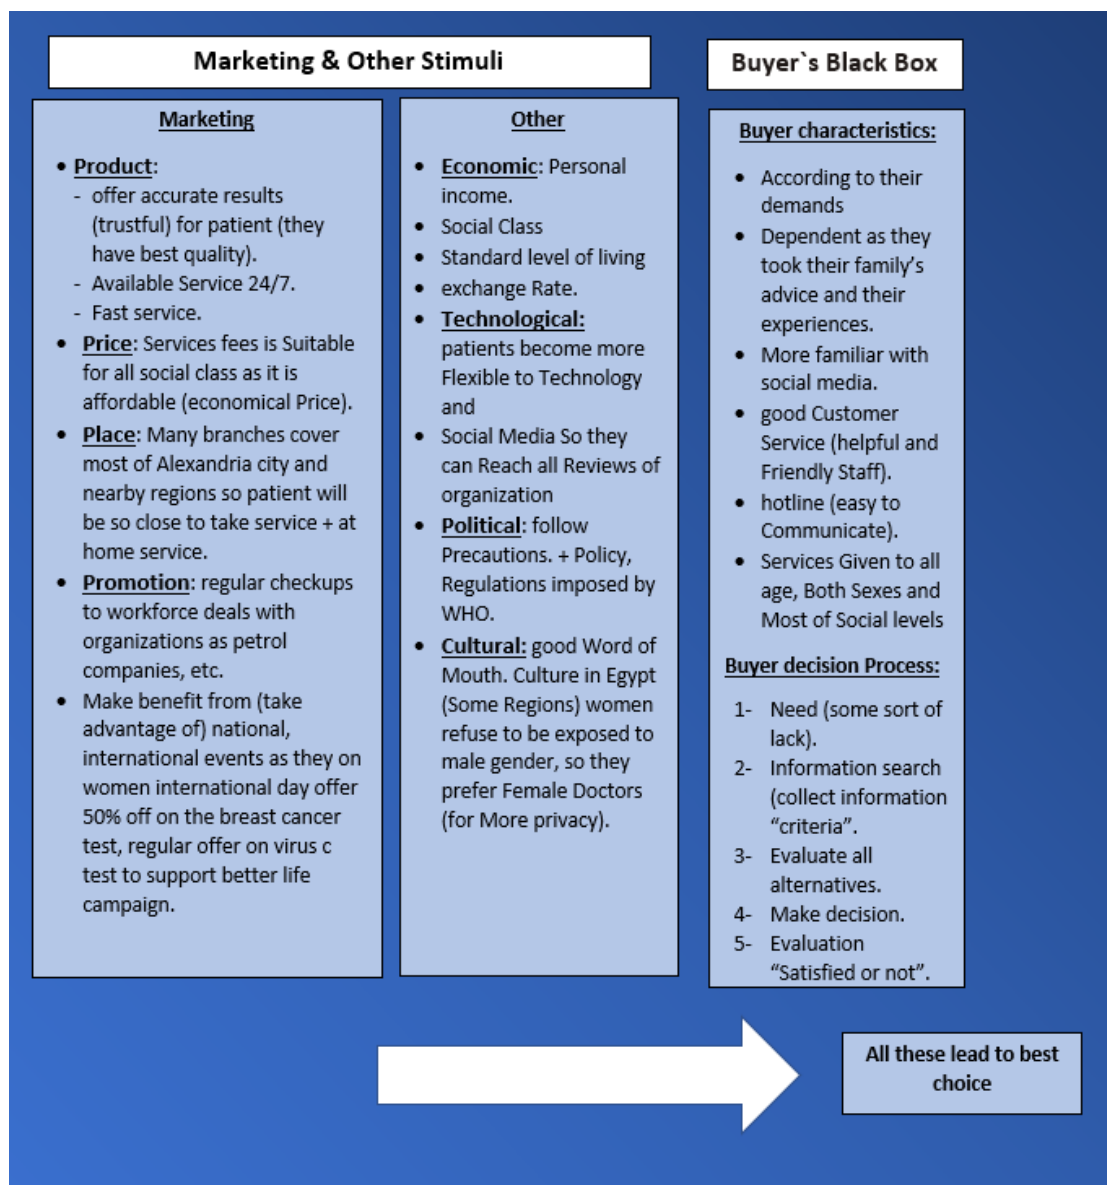

- 1- Patient must have the right care at the right time in a hygiene place at any cost.
- 2- Test results must be done very carefully with no error or wrong information.

4- SWOT ANALYSIS:

Lab SWOT Analysis			
S Strengths	W Weaknesses	O Opportunities	T Threats
• Existence in different areas (13 branches). • Existence stock of material. • Availability of service in two main labs 24/7. • Affordable prices. • Accurate results & good customer service. • Availability of Home visit Service. • Professional staff. • Consistency of service in all branches.	• Limited Marketing campaign on some branches(e.g. Sidi Gaber branch) • Limited Technology(e.g. website is underdevelopment).	• Existence of pandemic like Covid-19. • Participation in initiatives. • Building Conferences. • Good reviews. • Increasing in patients demand.	• Perception of staff after losing previous chairman. • Severe Competition in the same field. • Increasing prices in Chemical and kits. • Instability of exchange rate. • Bad reviews. • Absence of supply chain for a long time. • Decreasing staff during pandemic.

5- Consumer (patient) Behavior analysis:

5.1 Behavior Model:

5.2 Factors influencing consumer behavior:

5.2.1 Cultural:

Culture: Women prefer Female Doctors, Couples before marriage run some checkup tests.

Subcultural: Africans regularly do malaria, AIDS tests while European regularly do hepatitis, AIDS test.

Most People in Egypt eat unhealthy food (Junk Food) so they have to Make Some sort of tests for Safety.

Social class: According to Social class, Low level of social class frequently do anemia test High level of social class commonly does gout test.

5.2.2 Social:

Groups: All ages and both genders.

References groups and Family: Recommended By family and friends' key reference according to:- availability - hygiene - close to the patient - fast, high-quality service - good word of mouth

Also recommend by doctors.

5.2.3 Personal:

Life cycle stage: tests for pregnant woman e.g.: rh, for infants e.g.: anemia, jaundice

Occupation: Employees that work in petrochemical companies and radiation companies must do routinely checkups to maintain their health.

Lifestyle: behaviors of Egyptians in food (junk, full fat food).

Lifestyle of athletes require them to follow up their vital signs and run tests before championships.

5.2.4 Psychological:

Motive: According to Maslow' s hierarchy of needs people seeking for safety is important base to that hierarchy, as body is considered the home of human being its health is the priority, therefore patients' follow up to their health through continuous checkup test is a MUST.

Learning: Conceptual learning: Patients search for reviews about labs and feedbacks of other patients, so he collects information about the place very well.

Experiential learning: when patients come to the lab and have a good experience with our friendly staff and special doctors, also the lab is well organized (he becomes satisfied and supports conceptual learn).

5.3 Buying Decision Type (Consumer):

Varity seeking can best be described as the buying tendencies of the patient that does not have a high involvement with any medical services from a lab when there is a significant difference between brands. the consumer has little involvement with labs, because there are typically multiple options, as there are a significant number of labs in the area to select from. There is minimal evaluation done before he asks for the medical service, and his attitude towards the medical service of the lab will generally come as he does the test. If he enjoyed the process of the service there and had a good experience, then there is a chance that he may does tests in the same place whenever he needs again.

5.4 Decision Making Process:

Consumer decision Process:

First the patient recognizes the need to do a specific test. Then, Start searching for a laboratory with best properties (accuracy, hygiene, location, reputation, physician's recommendation). After that he must Evaluate each choice according to availability of the previous properties.

Patient obtains the required service in the lab he chose.

Finally, he gives feedback towards the provided service on social media platforms spreading a good word of mouth.

6- Buyer Behavior Analysis:

6.1 Behavior Model:

6.1.1 The environment:

Marketing stimuli

Service: Medical Insurance, Medical Syndicate etc. always search for laboratories with high quality service and high-performance technology to contract with them.

Price: searching for good price suitable their budget.

Place: Has Good reputation, history, well known and near from their.

Promotion: searching for lab making good deals, discounts and packages for their people.

Other stimuli:

Economic: instability of exchange rate

6.1.2 Buying organization:

They find the right laboratory with the appropriate packages among the deals that have been found and approved by the decision makers .

6.1.3 Buyer responses:

Service choice: The needed service is to make tests for their subscribers / workers

For different reasons if it is due to work criteria or because they need it as a privilege for their subscriber.

Supplier choice: They chose the medical field (laboratories) to make tests in it for their subscribers (syndicates and insurance company) / workers (petroleum, electricity or water)

Order quantity: They have different packages for different needs. If they are syndicates, they will need different packages with different prices and offers that suit each of their subscribers. If it is an insurance company, it will need privileges different from the syndicates, and if it is an petroleum, electricity or water company, it will need different packages for its workers at different prices and with different privileges.

Delivery terms and times: The method of service delivery is agreed upon by both parties, and they are two ways. The first is that the staff from the company, club, or syndicate go to the place to take the service, or that the staff go from the library to the company, club or syndicates to give them the required service, based on the terms written in the contract during the agreement. The time is mostly certain and fixed for petroleum, electricity or water companies, either at the beginning or end of the year and clubs are according to the season. As for syndicates, they are throughout the year because they are considered privileges for subscribers and insurance companies.

Payment: The method of payment varies from one place to another according to the different policies of the place and the contract signed between the two parties. Companies may pay all the money in one payment. Clubs and syndicates may pay money in separate payments. The insurance company may pay the money in three or two payments, according to the contract term and the agreed terms of the contract. They also try to choose the ways of payments such as cash and visa.

6.2 Factors influencing the Buying Behavior:

6.2.1 Organizational Factors:

Organizations like: Schools, Petroleum Companies, Electricity Company, Water Company, Medical Insurance, Misr Insurance, Medical Syndicate, Engineers syndicate, Banque Misr, Cairo Bank, Amreya Company, Abu Qir Fertilizer Company.

Objectives: Schools objectives: Schools aim to maintain the safety of the stuff and students' health to ensure that there are no serious diseases, schools' interest in this increased, especially after the Corona pandemic, to always have a safe and disease-free environment. Industrial companies, Banks' objectives: They aim to maintain safety standards and make sure their workers don't have any diseases that may affect the productivity of the organization to be less than expected. Medical insurances and syndicates' objectives: provide best service for their members to make sure they get benefits from this syndicate, insurance company and to maintain their health as they are more likely to consider 'lifetime value' in their decision.

6.2.2 Economic Factors:

Service: Organizations like the petroleum company is looking for a laboratory that provides test service for the company's employees, it's so important that this lab has the latest machines and tools to guarantee high accuracy in the results for specific types of tests related to this work, such as tests related to the lung, heart, Alcohol and drug tests, etc.

Schools: They are looking for a laboratory that provides test service such as complete blood count test, tool test, urinalysis, measuring hemoglobin in the blood for early detection of anemia, and certainly tests of the Corona virus, etc.

Medical insurances and syndicates: Looking for all kinds of different tests, starting from regular tests to tests related to the presence of serious diseases.

Price: These Organizations want to take excellent service at the best price in the market, they are looking for the lowest prices for the same advanced services from different mega labs. As they want to provide the tests service to the individuals concerned in these organizations to ensure the safety of their health and at the same time not to lose a large amount of money in these periodic annual or semi-annual examinations since the owner of the company is the only sponsor to pay all this money. Syndicates and insurance company: They want a good service to provide to the members of the commission, and they also want this service at the lowest price, Exclusive discounts for them to offer to their members.

All the mentioned organizations have been negatively affected by the rise in the price of the dollar in the recent period, as the prices of tests have increased in all laboratories.

6.2.3 Environmental Factors:

Technology: The Development of the instruments and machines used in the tests makes these organizations always want the up-to-date machines as to ensure the results are accurate.

The Petroleum Company: It wants some types of technology that are not available in many mega-labs, as it wants some types of tests that are carried out on these machines only.

Other factories want the presence of high technology, as it contains a large number of employees, so the tests mechanism must be fast and with accurate results.

Political: The government policies affect the organization buying behavior in corona, it made all organizations have to do the corona test as it is very necessary.

6.3 Buying Decision Type:

- New Task/buy: The company wants to place an order with a supplier for the first time, so it will conduct in-depth research and analysis on the products and services by getting samples from various suppliers to make the right decision.

6.4 Decision Making Process:

The buying process:

Problem recognition: Syndicates, petroleum, water, electricity and Insurance companies want to make tests for their employees.

Need description: Concluding an annual/periodic subscription contract to conduct periodic tests for its employees to implement work standards related to the health of employees or so that its participants obtain privileges and attract people to achieve profits if it is for profit.

Service specification: They search for different laboratories with good offers that cover all the required criteria for a place, such as achieving a certain price for a group of people within a fixed category or dividing the service into different categories for reasons of site policy. A place, such as being a syndicate or a club and wanting to make different programs for its subscribers or being a company that wants to have the same offer for its employees, so it wants a certain set of test / package at a price within a certain range to cover the budget imposed for it. In addition, if the company or syndicate will come to the laboratory or the laboratory will send to them a team to take their samples.

Supplier search: They are looking for different deals that suit their needs with an appropriate budget in different places. The offered deals are taken from different places and presented to the decision makers or the committee responsible for that in accordance with the policy and system of the place in order to decide and choose the deal that is most suitable for the place and be approved by all members of the committee or decision makers to be then proceed with the rest of the procedures.

Supplier selection: They find the right laboratory with the appropriate packages among the deals that have been found and approved by the decision makers and have been signed, and a team is sent from the Syndicate/club or company (insurance or petroleum / water/electricity) to the agreed laboratory to conclude the contract for approval and to check the items in it. Moreover, to pay part of the money if it's part of the agreement or all of the money.

Order-routine specification: They take the package annually/periodically with the best offers and the offers and packages are renewed or new packages are taken if the requirements of companies, clubs or syndicates are changed to suit the place and the contract can be for more than one year, depending on the contract concluded.

Performance view: Increasing the number of subscribers to obtain the privileges related to the chosen laboratory if it is reputable and good advertisements have been made that guarantee profit if the topic is related to profit and if it is a syndicate or company, this will affect the safety of employees in terms of accuracy in making analyzes to detect diseases early and work to treat them and help the company in making a decision.

7- Business Strategy:

7.1 Vision & Mission:

Mission: All Types of tests are available (More than 1000 test) for all diagnosis in all branches of lab with affordable price and accurate results.

Vision: Expansion in branches so the patient finds our laboratories near to him. (Now, there are 10 branches and 3 is about to open in borj El Arab, Tanta , kafr El sheikh)

7.2 Business Objectives and Marketing:

7.2.1 business objective

Build profitable customer relationship: They provide good service to patient as to be empathetic & focus on delivering clear communicating. They listen to patient's complaint & try to solve it to promote trust between lab and its patient. They also take patients feedback through reviews to ensure the patient is satisfied & build strong relationship with them.

Improve profits: Listening to patients' complaint & feedback & looking for making patient satisfied. That will create a good word of mouth so we will improve profits through keeping our patient & gain a new patient too.

Also, through expansion in Tanta & Kafr El-Sheikh, we add new segment & that will improve profit.

7.2.2 Marketing objective:

Increase market share: Expansion through existing service in new market segment as Tanta & Kafr Elsheikh (that is Market development).

Increase Promotion: Lab increases promotion through participation in initiative for spreading awareness (breast cancer & hepatitis c)

They make offers for organizations like periodic checkup for banks, schools & Companies. They make advertisement in streets & flyers.

They make conference & build strong relationship with physicians.

7.3 Business Strategy:

They follow market development as they have the same services in all branches of lab with a new market geographic segmentation.

8- Market Segmentation:

8.1 Segmentation bases & why:

Mabaret Al-Asafra categorize people according to district and Regions and social classes as their vision to expand through cities to cover most of the country. They start small with one main lab in Mabaret Al-Asafra Hospital then open new branches, 10 branches have been opened and 3 is about to open soon. They try to reach patients wherever they were .

8.2 the selected segmentation strategies:

The selected strategy that lab follows are Psychographic : Audience classification by Social class : A-B-C , Geographic segmentation through categorizing audience according to regions and districts .

Alexandria districts : Montazah, Sharq (eastern Alexandria), Al-Gomrok, Wassat(central Alexandria), El-Dekhila-Agami (western Alexandria) and Al-Amriyah

Regions : Lower Egypt ,Middle Egypt , Upper Egypt , Western Dessert , Sinai

8.3 The resulted segments& description:

Reaching patients over Alexandria city and some other cities, as they make it easy for patient to reach our lab next to him. They serve many segments of people regardless their age or social class.

9- Market Targeting:

9.1 the targeted segment (s) & why:

Geographic - Demographic - Psychographic – Insurance

9.1.1 Geographic

Region: Lower Egypt region , considering Alexandria branches , Damanhur branch, Kafr Elsheikh branch and other And potential branches to open in the same region

Alexandria districts : Montazah(Abu Qir Branch), Sharq (Bolkely Branch - Gleem Branch - Roshdy Branch - Sidi Gaber Branch) , Wassat (Azarita branch - Muharram Bek Branch - Raml Station Branch - Smouha Branch), El-Dekhila-Agami (Agamy branch)

9.1.2 Demographic

As we divide market into groups based on: Marital Status, Occupation, Age, Gender

Marital Status: There are essential tests couples should do before getting married, pregnancy tests as tests and results are affected by marital status.

Occupation: Particular jobs expose their employees to chemical and petrochemical industries, carpentry and wood working, radiation which provide the need for frequent checkups.

Age: All needed tests are available for different patients from infants to elders.

Gender: By census, there are certain diseases related to one gender more than another example pneumonia is more common in men than in women, while cervical cancer is only in women.

9.1.3 Psychographic

As we divide market into groups based on: Social Class, we aim customers of A- or B class.

9.1.4 Business-to-Business (Organizations Deals)

We as Marketers see that Mabaret El-Asafra needs expansion to increase the number of organizations they cooperate with for example they can cooperate with schools through frequent vaccinations and tests as Hepatitis C Virus Campaign Test.

We also divide market into Groups based on:

Lab To Lab: Each offer includes number of tests, type of test, profit percentage

Syndicates (نقابة الأطباء و المهندسين), Insurance Companies: due to the increase in number of employees (workers) in the country, insurance companies tend to expand their deals with more companies and organizations that help increase the spread of Lab's name.

Syndicates also try to keep in touch with fresh graduates of various fields, so it makes great offers with different labs one of them Is Mabaret Al-Asafra.

Walk-In Customer: This type of customer has no benefit from offers of other type, has his own price

9.2 Its targeting strategy & why:

Differentiated, as we target several different market segments and design separate offers for each to achieve higher sales and stronger position.

10- Marketing Positioning:

10.1 Its positioning strategies & why:

Mabaret Al-Asafra focuses on providing the famous tests and all kinds of tests to its customers at an appropriate cost for all categories before their competitors with high quality, on time and the right choice.

Positioning strategy components:

Customer: The target customer is everyone who wants to do one or more test. He expects to take accurate results, good quality and receive results on time.

Competition: the competitor is any mega lab is considered as a competitor as: Hassab, Cataract, El-Mokhtabar, El-borj, Alpha and Al-Shams. They offer mainly the same tests of AL-Mabara labs, and they are trying to make the same positioning strategy.

Mabaret Al-Asafra uses the following types in positioning strategy:

Attribute/Benefit Positioning: They target and develop their services on an ongoing basis to suit the needs and requirements of customers, such as: There is a service for home delivery of test results to customers, and they can also be sent via mail or social networking sites to save time and effort and meet customers' demands

Price/Quality Positioning: they introduce their service with high quality to the customers with a suitable price for all customer types to guarantee their customers' loyalty compared to other laboratories that offer the same service, but at a higher price. The quality They always try to provide the service at the highest possible quality to the customer, to be better than their competitors in quality and performance.

11- Describe the products or service in your company it in terms of the following with justification:

11.1 Services Attributes:

"Mabaret AL-Asafra Labs" offers specialty service for patients which is a medical service: The lab tests with many Attributes as it provides a high-quality test result for more than 1,000 test with Suitable prices for each test and Receive results as quickly as possible, with no delays and procrastination, Also, Accurate results for more accurate diagnosis of the disease.

All these services Available 24/7.

11.2 Brand, is it effective one?

The Brand includes the name “Mabaret AL-Asafra Labs”, a label which is “laboratories” and a design of “Mabaret AL-Asafra” logo.

It's effective as it is easy to pronounce, recognize, and remember, distinctive and Capable of registration and legal protection, it's also suggested benefits and qualities.

11.3 Core, Actual & augmented features:

11.3.1 Actual service:

- Brand name: Mabaret Al- Asafra Labs
- Quality level: High quality with suitable prices.
- Design: Logo contains 3 colors to stuck with patients' mind: Red(Focus, positive), Blue(creativity) and White (Pureness , clarity).
- Features: high quality test results for more than 1,000 test, suitable prices for each test, Receive results as quickly as possible, with no delays and procrastination, Accurate results for more accurate diagnosis of the disease.
- Packaging: Samples are stored in containers designated for each type of test, It is sent from patients to the lab, Then An envelope is sent to the patient containing the paper for the test results, on which the name of the patient, the hotline number for inquiries, and the logo are written.

11.3.2 Augmented service:

- Delivery and credit: The lab offers delivery service and to pay with cash or credit.
- After sale service: there is a hotline number for inquiries to understand what the results are, and what the health condition of the patient is.
- Empowered and licensed by ISO qualification

11.4 Product type: industrial or consumer & why:

It is a consumer product (Specialty products: Medical services) because they give the customers a medical service which is lab tests.

12- Analyze the branding strategy ion phases:

12.1 Brand positioning: attributes, benefits, beliefs, & values:

Attributes: Mabaret Al Asafra offer an affordable price and has a convenient location with Modern equipment, Clean and sterilizes equipment and everything use in lab.

Benefits: they are trusted lab that always gives to their patients an accurate result and fast response. Also, offer a Home visit service to facilitate service delivery and hot line to facilitate communication between patients.

Values: more than 1000 tests – 2 from 10 branches open 24 hours with good treatment from staff and doctors.

12.2 Brand selection & protection:

Our Brand Name selection is characterized as it easily readable, pronounceable, and easily remembered. It is familiar to patients as the Lab's Name of the first branch is like the district's Name.

Slogan: مقياس الدقة – ويستمر التطوير that Clarify their mission.

12.3 Brand sponsorship: manufacturer brand, licensing, co-branding:

Mabaret Al Asafra is considered as Manufacturer brand that it has their own brand "Main company"

12.4 Brand development Strategy:

They follow line extension strategy as they have the same existing service with existing brand in all branches.

13- If it services company, does it apply any of the following strategies & why:

13.1 Internal Marketing Service Strategy:

Educating employees about the organization goals and values and ensuring that employees know their contributions matter and are essential to the organization's success. As the whole experience of the consumer beginning from the counter to the doctors who do the test until it delivered matters, affect the consumer satisfaction.

Fostering communication and collaboration among employees and Support, orient service providers to work as team

- Provide results in shorter time with the highest quality
- Meet consumers' need
- Therefore, acquire consumer's satisfaction

13.2 Managing service differentiation:

At our lab we create lots of competitive advantages

Offer: We offer fixed contracts with companies like electricity company to do periodic checkups for the workers with prices agreed on and Online call center to make it easy to communicate with clients and patients (WhatsApp and messenger), Also there is a Home visit service (for corona virus PCR).

Delivery: Delivery of results is divided into online (pdf form) and offline delivery (paper form)

Image: Included as symbol of historical, well-known labs of high-quality results, exceptional reputation.

13.3 Managing service quality:

Provides a competitive advantage by delivering consistently higher quality than its competitors

- Grant the availability of all kinds of test all time
- Accessible 24/7, 7days/week
- Considered pioneer in the field of lab-to-lab
- One of the best mega-labs in Alexandria, soon all Egypt

14- List the communications used by your company and identify if they are personal or non-personal:

14.1 Advertising is considered as non-personal communication

posting advertisements on the internet through their Facebook page to announce the available offers, new packages and hang banners outdoors.

14.2 Sales promotion is considered as non-personal communication

For B to C, they make offers, discounts, and new packages to encourage patients to come
For B to B, they follow Advertising specialties tool as they give notebooks, calendars, and pencils for doctors in clinics and hospitals so that patients are more likely to see our lab and to make doctors recommend our lab for patients.

14.3 Public Relation considered as non-personal communication

They are seeking for building a strong relationship with customers, so they usually make special events, participate in conferences (e.g.: المؤتمر الدولي للجمعية المصرية لأمراض الكبد والجهاز الهضمي و المناظير)

Also participate as sponsorship in events, sometimes make audiovisual materials and uploaded on Facebook page.

14.4 Direct marketing considered as personal communication

Forming campaigns to send messages on mobile phones to targeted patients to announce for new offers.

15- Evaluate each communication tool using AIDA Model:

AL-Mabara labs advertising aims to make costumers aware the services that exist and knowing the new discounts and packages. then creating interest by offering accurate results as quick as possible. The lab awakes consciousness of people to be careful about their health and that makes patients to have a desire so they can take a step toward lab and come.

Applying this model on one advertisement

Attention: they post ads on their Facebook page about hydrogen breath test.

Interest: they tell patients a short brief about that new test, and they are the first lab in Alexandria to prepare for this test, so they create the interest and catch customers' attention.

Desire: customers become more seeking for to know more details about this test and begin to write comments and to ask about more information.

Action: customer start to communicate with lab for test.

16- Identify the type of the message appeal in each communication tool:

We work with Rational appeal to meet patient's needs owing to the fact that medical need encounter with the reasonable and balanced decisions not guided by emotional decisions.

17- Identify and justify the method of the communication:

Objective/task: They establish set of targets to accomplish and determine the cost of the campaign.

Competitive parity: They determine specific budget to match or overcome the competitor advantages in machines, chemical kits, hygiene, Technology and Campaigns. They also add new features to provide competitive advantage.

Percentage of sales method: They determine the profit or sales and according to it they spend certain percentage of revenue to the next campaign. Which guarantee win-win deal to the corporation.

18- Analyze the communication 5 steps of the effective marketing communication process:

18.1 Identifying Target market:

Al Mabara labs use differentiated marketing as they target several different market segments and designs separate offers for each one as explained before. And the best and most efficient way to communicate with the target audience is through famous doctors. As they target all the market, people with different age, gender, and social classes. Al Mabara labs want to achieve or accomplish with its communications efforts a purchase response from audience. And to make this happen, they must convince more patients to make the test in al mabara labs through marketing.

18.2 Determining the Communication Objectives:

Awareness: The patient must be aware that the service exists, As Al Mabara labs makes advertisements in many areas about its presence in a variety of areas and that the patient can go to any branch to get an excellent service.

Knowledge: Patients in different parts of Alexandria has to know that AL-Mabara labs have the latest equipment, high accuracy with quick results, good hygiene in the labs also plays a vital role in ensuring that patients do not catch dangerous infections and diseases, while also ensuring that germs and bacteria cannot spread to visitors and out into the general community.

Liking: The patient begins to like the laboratory, its superior service, and its high efficiency.

Preference: Al-Mabara Laboratories will be preferred over competing laboratories because they have cheaper prices than all competitors, have better equipment that ensure the high accuracy results.

Conviction: AL-Mabara labs lab offer the service of performing various tests, it's not a product that can be purchased, so Al-Mabara labs have to convince people, even if they are not feeling sick, they have to do the check-up tests periodically to ensure the safety of their health, as this helps in the early detection of symptoms of any disease.

Purchase: People were convinced and went to Al-Mabara labs to do the required tests.

18.3 AIDA:

Attention: AL-Mabara labs advertising aiming to one goal that is to make consumers aware that the service exists.

The lab distributes flyers in different regions, distributes note boxes with the lab logo printed on it, in which the doctor can write the prescription for patients in his clinic, and placing banners in different locations that saying there are new branches of the lab in some places nearer to patients.

The second and third steps of the AIDA model go together:

Interest: Once the patient is aware that the service exists, they must work on increasing the potential patient's interest level. For example, Al Mabara Labs boosted interest in a specific collection of tests by announcing that they had an offer for this group of tests. AL-Mabara labs Focus on what is most relevant for their target market in relation to their service, as making offers on different types of tests, indicating that they have the best equipment with qualified doctors

Desire: After the consumer is interested in the service, the goal is to get consumers to want it, and move their way of thinking from “I like it” to “I want it” AL Mabara labs convey to the public the value of the service that is the fastest service to obtain the results of the tests, with high accuracy and at competitive prices with competitors, so patients need it, and non-patients also need it to check on their health constantly.

Action: The ultimate goal is to drive the receiver of the marketing campaign to initiate action and purchase the service.

The advertisement should end with a call to action, a statement that is designed to get an immediate response from the consumer

So, Al-Mabara uses persuasive text to convince the consumer to try their groups of tests, that will have a 50% discount compared to doing each individual tests alone. Al Mabara labs communicates how convenient their service is and highlights its value, then urges consumers to go for the discount.

18.4 Determining the Message:

AL Mabara labs use Rational appeal of Message content because it relates to the audience's self-interest, as the message is involved in ensuring the safety of people's health because health is the most important thing that people care to maintain, also messaging style is an important part of reaching the labs' target audience. This process includes utilizing the most appropriate messaging style based on market research, so they keep it simple, convincing and relevant.

18.5 Choosing Media:

Al Mabara uses non-personal communication for advertising. They only distribute flyers, notebooks for the doctors to target its patients, placing banners in many locations as to be seen, and the less effective one is the Facebook advertising as it's not reachable to many people.

Selecting the Message Source: As mentioned before, al Mabara labs communicate through selected doctors with high patients' rates distribute many gifts to them as: calendars, notebook, flyers that has offers, all of these have the labs' logo to ensure that a huge number of patients will see the logo, and then to initiate action and purchase the service

18.6 Collecting Feedback:

Involves the communicator understanding the effect on the target audience by measuring behavior resulting from the communication: they measure it by counting how many patients come from the doctors' clinics and then increase the gifts for these doctors because they have a positive impact on the lab, and clinics with less impact, change them to clinics for other famous doctors.

19- List the digital marketing tools used by the entity:

19.1 Search Engine Optimization:

Using this service for making their Facebook page reachable for patients and their Name become at the top of search results.

19.2 Content Marketing:

Content of Facebook page or website is very important so sometimes they post health instructions and wise articles for health or some kind of disease, sharing any event or conferences they participate in also some kind of short videos for awareness.

20- Analyze their effectiveness:

Lower cost and build audiences because it reaches various number of people in short period therefor they deliver the message & grow the brand name. It Also provides easy connection with patients through this page. It allows receiving patients questions with customer service to answer them.

Internet has created huge opportunities for the regular consumer we needed to be aware of the facts of their needs that drive them into consuming our service.

Statistically over 50% of world's population use the internet, over 70% of Egypt's population use social media and Facebook is considered the second most famous platform among social media users.

21- Recommend with justifications other digital marketing tools as well as ways to improve:

21.1 Social media advertising:

Facebook: Posts on Facebook can be more interactive with people in order to increase the number of interacting with the page and thus the possibility of people knowing the page will be greater. Through several steps:

1-Knowledge quizzes on medical information then choose only one winner of those questions and give him a promo code that can be used to deduct 10% of the cost of any test for a limited period to ensure a speedy visit to the lab to use it.

2- Post on a specific periodic basis the importance and benefits of the less frequently used tests to educate people about their importance and low prices. They can use a

program to do this: Hootsuite is a tool that helps you schedule your social media posts in advance.

3- Make an interactive question about which tests the patients want to have a 10% discount on it, because they need it but it's a little expensive. These comments will activate your pages and increase interaction, which reduces the cost of your ads and increases reach.

4- Use hashtags in posts will increase the possibility of patients with interest to see the posts.

5-The social media trend is very important, but use it right in the lab area

6- Facebook Inbox: make it active 24/7 to answer all the questions, as Through it, you can follow up on your customers constantly and make them retarget Through ready-made bots like the chef and super chef from AMC tools.

Email Marketing: E-mail is the godfather of digital marketing as the lab reach each person individually and ensure that he receive the specific content/ information the lab want to receive as: offers, new tests, etc.

Account on Instagram: Creating account on Instagram that posts videos of different doctors talking about the importance of conducting regular tests to make sure your health is good, also aware the people about the less known tests like: Building Instagram account is very effective to create a relation between the patients and the talking doctors as well as the total lab, this will make the patient trust the lab even more.

Pay more for your online advertising to make it Appear to more people Level-up your website by:

1- Pay attention to providing infographic content

2- make a registration option to book an appointment by websites

3- supply the website with all the tests information like: you should be fasting before doing this kind of tests.

22- Identify the current used marketing KPIs offline and online:

1. The number of new contracts signed for each period: Knowing the development of relations with companies, partnerships, and new deals, such as those made with suppliers of chemicals or equipment or with syndicates. This is written in their reports and counted regularly.
2. The number of qualified employees involved in sales department: to find out whether the number of employees is sufficient or not and based on which competencies and works are determined. Follow-up is done through the LLDM program that monitors everything related to the place and the work of the employees. Anything they do and new deals they take are counted regularly and periodically to come out in reports.
3. The number of clients retained: Monitoring the rate of patients' retention in all branches in a period of time. They collect the number of existing customers at the start of the time period then they collect the number of total customers at the end of the time period then they determine the number of new customers added within the time period.

$$\frac{\{[(\text{The number of existing customers at the start of the time period}) - (\text{the number of total customers at the end of the time period})]\}}{\text{the number of new customers added within the time period}} \times 100.$$

4. Order completion time by the average waiting time of customers: The time required to serve clients (they should not wait long) is followed up through the LLDM Software that monitors everything related to the patient and the workflow from the administration department till he receives the result of his test. Also, it tracks the sample.
5. Number of visits or number of physician calls: when the marketing and sales department deals with certain doctors to convince their patients to make their test in Al-Mabarah. They measure this with the number of contracts or deals signed after every physician call by the following formula. $(\text{number of agreed physician})/(\text{number of total physician calls})$
6. Sales qualified leads (SQL): the result of the physician calls, they measure it by the Count(Sales Qualified Leads) , they count it throw the LLDM software and the hard and soft copy surveys to know where they got the customer.
7. Number of visitors to the site: the number of visitors to the site per month and their interaction, the site is missing a lot of things.
8. Facebook interaction by likes, comments and share: They monitor every post, video, or photo to keep track of people's reactions and likes if the topic has attracted them. Likes: The number of times followers interact with a Facebook post by clicking the Like button. Comments: The number of times the followers comment on posts. comments may be positive or negative sentiment, so a high number of comments isn't always positive.
9. Audience growth rate: to make sure that they are gaining followers. shows how the number of followers changes over time. They calculate it for the social media pages (Facebook page) by using the following formula. $AGR = (\text{New followers} / \text{Total followers}) \times 100$
10. Post reach percentage: This is how many people have seen a post since it went live and it gives them an idea of what their audience finds valuable and interesting for them. Reach changes depending on when the audience is online and how good content is. They calculate post reach by the following formula. $\text{Post reach percentage} = (\text{post views} / \text{total followers}) \times 100$

23- Recommend more marketing KPIs with justification:

1. Marketing return on investment (MROI): The higher the resulting percentage, the better the return.
2. Customer Acquisition Cost: to measure the effectiveness of marketing campaigns.
3. First Contact Resolution: the rate of first contact resolution. Measure the number of clients who need to reach out to customer support multiple times for the same issue.
4. Customer Attrition: Measure the rate at which Al-Mabarah loses customers over time.
5. Response Rate: Measure the total number of customers who respond back to your company's communication efforts.

24- Recommendation:

1. Focusing on new branches in other cities to build reputation and strong relationships with new customers.
2. Focusing more on content marketing by providing more awareness videos from expert doctors about health and seasonal infectious diseases.

3.Improving their website’s interface and make it more interactive with provision of online reservations and payments.

Recommendation for Digital Marketing:

1.Using email campaigns tool for sending emails to targeted segments when new offers are available that match their needs.

2.Use affiliate marketing tool to stand out the lab's name and make it more apparent.

25- Survey to measure the efficiency of lab:

26- Conclusion:

Finally, we collected, analyzed, and searched about Mabaret Al-Asafra labs' conditions, environment, strength, weakness and a lot. So that we can create a suitable marketing plan and campaign after doing enough study.

Microenvironment is a decentralized organizational structure. In Microenvironment our actors are suppliers, marketing intermediaries and competitors, they help our lab by providing resources or help in linkage with the final product buyer or has a strategic advantage against other competitors. The suppliers are divided into 2 groups local suppliers and external suppliers.

Macroenvironment: There are 6 forces that affect the environment of marketing of the lab that it must monitor frequently which are political, legal, demographic, economic, natural, and cultural. They decided to open a series of successful laboratories in stages over the years. Al-Mabara labs' goal is to provide the medical service (making tests) to patients with high quality results with best affordable prices, so the labs need equipment, kits and all these different supplies that are supposed to be in the lab to provide the service such as to measure, analyze, and test. The service provided to patients is not only represented in the test, but also in the high speed of the results which is provided by Al-Mabara.

From the important findings that caught our eyes was the bugs in their online website and lack of system in it

We recommend that they fix the bugs and adjust the interface to make it easier for use and catchy to more patients. We recommend making offers on frequent checkups like blood pressure and glucose measurement tests to encourage more people to come to their lab also make more packages that include specific tests for pregnant women and to follow them for any extra needed tests. In addition to, focusing on the new branches to apply equal services like other branches of lab to build trust with their patients and to achieve customers' need and satisfaction.
